

Abstract

An adjustable door guide latch slot assembly for aligning a slidable door latch with a fixed door guide includes a striker plate having a latch opening and a door guide having an inner surface with a recessed area on such inner surface, said recess area being larger than said striker plate and having an opening therein, whereby said striker plate may be placed flat against said door guide inner surface in said recessed area and adjustably affixed to said door guide inner surface so that said striker plate latch opening may be made to align properly with said slidable door latch.
